

DermaTherapy®  
Cleaner • Drier • Smoother

# Sleepsac™

Portable Bedding in a Bag.

Temperature and allergen control in one.

Smooth as silk, antimicrobially protected fabric fits any bed whilst the integrated pillowcase keeps allergens away.

**Ideal for:**

**Sleep-overs**

**Holidays**

**Business Trips**

*Take a fresh, clean and allergy free sleep system wherever you go.*

The DermaTherapy Sleepsac has been specially designed to surround the sleeper with a cocoon of silky smooth material.

Excess heat and moisture are quickly wicked away from the sleeper, ensuring a good night's sleep, whatever the underlying surface.

A permanently bonded antimicrobial keeps the fabric fresh and clean and the tight weave of the fabric maintains a barrier that is impervious to house dust mites.

Finally, the design of the Sleepsac ensures that only the DermaTherapy fabric comes into contact with the sleeper - even the pillow slots into the underside of the Sleepsac!

## *DermaTherapy Sleepsac is versatile*

Our bedding in a bag is ideal for trips away from home.

- Children on sleep-overs or visiting relatives
- Children or adults on holidays
- Business Trips

When you are unsure of the bedding, or simply want a good night's sleep - take it with you!
